DETAILED ACTION

1. Claims 1 - 45 are allowed.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The closest prior art of record discloses a system and/or method for cryptographic key distribution and to establish a secure secret key between two or more terminals through a network center. Prior art also disclose a software licensing system that creates a license pack containing a set of one or more individual software licenses that contains a unique license pack ID that are encrypted with license server's public key which prevents issued license from being copied form one client machine to another. However, the closes prior art of record either individually or in combination does not explicitly disclose a data distribution system for distributing at least a license key fro decrypting encrypted content data between said license key and said encrypted content data to each of terminals of a plurality of users form a content data supply device, comprising: a second license data encryption processing unit for further encrypting the output of first license data encryption processing unit with second symmetric key extracted by said session key decrypting unit, and supplying the encrypted output to said first interface unit in light of other features disclosed in independent claims 1, 7, 12, 19, 30, 42 and 44 in generating doubly encrypted license key for decryption of encrypted content data.
